SUMMARY

AI/ML Engineer with hands-on experience in Computer Vision, LLM-based systems, and MLOps workflows. Currently studying Computer Science at Brawijaya University. I have been involved in multiple AI projects and competitions, developing and deploying end-to-end systems from visual recognition models to scalable machine learning services. Focused on building practical, reliable, and impactful AI solutions.

EXPERIENCE

- Vice Head of Data Science Department**12/2024 - Present
Basic Computing Community (BCC) ↗
 - Assist the department head in managing the data science team, including delegating tasks to team members based on their expertise.
 - Guide team members in developing technical and non-technical skills to support the department's objectives.
- AI Researcher in Intelligent System Laboratory**09/2024 - Present
Fakultas Ilmu Komputer (FILKOM)
 - Conduct research focused on synthetic medical data generation using generative AI techniques.
 - Explore innovative solutions to improve data quality and availability in medical fields through advanced AI models.
 - I frequently compete in Computer Vision challenges, specializing in CNN development for object detection, image classification, and OCR.
- Computer Vision Engineer**02/2025 - 06/2025
Vehicle Detection System
 - Designing and Implementing an Automated License Plate Detection System to Enhance Campus Security and Traffic Management
 - Fine-tuning a Deep Learning Model for Optical Character Recognition (OCR) to Accurately Extract and Process License Plate Information
- Machine Learning Researcher - CBR 2**09/2024 - 02/2025
SOI Asia ↗
 - Developed machine learning models for a Network Intrusion Detection System to enhance cybersecurity measures.
 - Conducted experiments to explore the application of machine learning techniques and optimization in cybersecurity.
- Vice Project Officer of Data Science Mini Bootcamp 2024**07/2024 - 10/2024
Basic Computing Community (BCC) ↗
 - Assist the project leader in managing and coordinating divisional teams to ensure the smooth execution of the event.
 - Act as a mentor, guiding participants through hands-on activities and providing insights into data science practices.

EDUCATION

- Computer Science**08/2023 - Present
Brawijaya University - S1
- Science**08/2021 - 05/2023
SMA Negeri 2 Kota Madiun

SKILLS

Computer Vision	Intermediate	Python	Intermediate
Deep Learning	Intermediate	Leadership	Intermediate
PyTorch	Intermediate	Problem Solving	Advanced
Machine Learning	Advanced	Critical Thinking	Advanced
Java	Intermediate	Team Work	Advanced

PROJECTS

AI Engineer Krowten AI ↗	01/2025 - 01/2025
- Created a chatbot to address questions on networking and security concepts from academic materials. - Designed to support learning at the Faculty of Computer Science, Brawijaya University.	
AI Engineer Career Path AI	10/2024 - 12/2024
- Developed an AI system to recommend jobs based on a CV, aligned with market opportunities. - Added a scoring feature to evaluate the CV by comparing it within the same field.	
ML Engineer Sentiment Analysis Tweet Election 2024 ↗	03/2024 - 05/2024
- Developed a machine learning model to predict tweet sentiment on the 2024 General Election in Indonesia. - Focused on analyzing public opinion through sentiment classification of election-related tweets.	

AWARDS

1st Place Winner - ElevAlte Hackathon Indonesia Hub Brawijaya Microsoft, KOMDIGI, Biji-Biji	06/2025
ML Engineer responsible for model development and MLOps deployment of a scalable AI solution	
Data Mining Finalist - GEMASTIK XVII 2024 Pusat Prestasi Nasional (PUSPRESNAS)	09/2024
Creating Research of "Otomatisasi Deteksi Jalan Berlubang Menggunakan Model YOLOv8 dengan Optimalisasi Domain Adaptation" for preliminary session	
Olympiad Finalist of Cyber Security and IoT ARA ITS 2022 A Renewal Agent, Institut Teknologi Sepuluh Nopember	04/2022
